

Metropolitan World Atlas

The Metropolitan World Atlas enables you to compare at a glance such statistics as population density, use of the underground, data traffic, average speed on motorways and the average temperature in July in metropolitan areas such as Beijing, Lagos, London, Los Angeles, Rio de Janeiro and Tokyo.

The surprising combination of plans and statistics and the compact size and magnificent design make this atlas indispensable as a source of inspiration to the public at large as well as to urban planners, architects and graphic designers. Like 010's big KAN atlas and the Limes Atlas, the Metropolitan World Atlas was designed by Joost Grootens.
