NEW: DE STAD

Every city is a collage, consisting as it does of multiple layers that are planned, used and experienced in different ways. The filmed city, the stochastic city, the fortified city, the participatory city, the garden city, the digital city, the open city and the healthy city all come under consideration here. Together they present a broad panorama of the ways designers, clients, historians and users think of the city. This liber amicorum was presented on Friday, January 13th 2006, to Ed Taverne, Emeritus Professor of Architecture and Urban Design at the University of Groningen.
