**DESIGN: NEW**

**FLYING LIGHTNESS. PROMISES FOR STRUCTURAL ELEGANCE**

From the makers of *Lightness*. Once again the authors give their account of the development and application of new light-weight materials and structures, this time in the world of air travel. Beautifully designed and lavishly illustrated.

*Flying Lightness* paints a heroic picture of a century of aircraft development against the background of steadily increasing travel speeds. Yet since the Wright brothers made their first brief flight over 100 years ago, aircraft construction seems to have become strangely stuck in a rut.

\* book details: *Flying Lightness. Promises for structural elegance* / Adriaan Beukers, Ed van Hinte / design Erik Wong, Eva Heisterkamp / English / 135 pp. / 17 x 23 cm / paperback / ISBN 90 6450 538 1 / euro 24.50 / for more information visit [www.oiopublishers.nl](http://www.oiopublishers.nl) and click on 'recent titles'

Other OIO books on this theme:

- **LIGHTNESS. THE INEVITABLE RENAISSANCE OF MINIMUM ENERGY STRUCTURES**

On the development and application of new lightweight materials and structures. Soon in its fourth edition.

What the press said about *Lightness*:

- Every so often a book appears which touches one's soul. I had a similar experience when I found *Lightness* (Professor Alan J. Brookes in *Building Research & Information*).
- It should be compulsory reading for every student of architecture, and would not go amiss on the bookshelves of the majority of established architectural practices as a reminder of what actually lies behind the much misapplied image of minimal construction (Ingerid Helsing Almaas in *Architectural Review*, September 1999).
